THE FCI STORY

Since its inception in 1984, FCI has become a world leader in products that solve problems in the areas of Dry Eye, Oculoplastics, Cataract and Retinal procedures.

Through close collaboration with leading ophthalmic surgeons worldwide, FCI is continually developing and testing products that contribute to the quality of patients’ lives and products that respond to physicians’ needs with advanced materials and innovative research.

FCI is excited about the future and is dedicated to the advancement of quality in eye care. FCI conforms to the world’s standards for quality in design, manufacturing and service:

All FCI Ophthalmics products approved by FDA for commercial distribution.

FCI-Ophthalmics.com 800.932.4202
One Plug  
One Size

SNUGPLUG™

That’s all you need!

One-size-fits-all punctum plug eliminates sizing and simplifies stocking

Pre-stretched shape (on inserter) avoids dilation and facilitates insertion

Expanded shape (once inserted) assures snug fit and virtually eliminates pop-out

Soft collar prevents migration and provides patient comfort

Visit FCI-Ophthalmics.com to watch the SnugPlug informational video.

Permanent Punctum Plugs

SNUGPLUG™

Plugs are packaged preloaded in a stretched position and return to their natural shape when released from inserter.

- For punctal occlusion
- Medical grade silicone
- Permanent yet removable
- Individually packaged
- 2 preloaded plugs per box, sterile

SNUGPLUG (cont.)

REady-set plugs

Designed by J.A. Bernard, M.D.

Ultra-thin collarette conforms to natural anatomy of the eyelid for maximum patient comfort.

Preloaded on disposable inserter/dilator instrument for ease of insertion. Easily removed with forceps.

- For punctal occlusion
- Medical grade silicone
- 2 mm long
- Individually packaged

2 preloaded plugs per box, sterile

Slim plugs

The Slim Mini and Slim Petite plugs offer a slightly smaller bulb for easier insertion into small puncta.

Exclusive Slanted Collarette plugs

The Micro to Large plugs feature the unique slanted collarette that hugs the natural curve of the eyelid.

The slightly larger bulb resists migration and is designed to prevent rub-out.

Non-sterile plugs

Ready-Set plugs are pre-mounted on a wheel for quick and easy loading onto a plug inserter.

- For punctal occlusion
- Medical grade silicone

24 plugs per box, 2 inserters, 1 wheel, non-sterile

Variety Pack: 6 plugs of each size (0.4, 0.5, 0.6, 0.7 mm)

Tearsaver plugs

The tapered shaft design helps to anchor the plug securely in the punctum for more comfort and less risk of rub-out.

Preloaded on disposable inserter/dilator instrument for ease of insertion.

- For punctal occlusion
- Medical grade silicone
- Permanent yet removable
- Individually packaged

2 preloaded plugs per box, sterile

FCI Ophthalmics
Permanent Punctum Plugs (cont.)

PVP PERFORATED PLUGS

Designed by J.A. Bernard, M.D.

These plugs are coated with a thin layer of polyvinylpyrrolidone (PVP) that makes the surface slick to prevent debris from collecting on its surface and enhance drainage.

- For partial occlusion or punctal stenosis
- Medical grade silicone with PVP coating
- Individually packaged

2 preloaded plugs per box, sterile

Temporary Punctum Plugs

COLLAGEN PLUGS

- To diagnose dry eye
- To assess the effectiveness of permanent punctal occlusion
- Collagen-dissolvable in 5–7 days
- 2 mm long

6 plugs per packet/12 packets per box (72 total), sterile

Variety Pack: 6 plugs per packet/4 packets of each size per box (72 total), sterile

PROLONG™ ABSORBABLE LONG TERM PLUGS

- For short term dry eye conditions
- For post surgical dry eye symptoms
- Absorbable copolymer – lasts up to 3 months
- 2 mm long

2 plugs per packet, 10 packets per box (20 total), sterile

Variety Pack: 3 packets 0.3 mm, 5 packets 0.4 mm, 2 packets 0.5 mm, sterile

Tear Test

ZONE-QUICK

A simple and accurate system that measures tear volume in just 15 seconds per eye. Each box has an easy to read diagnostic indicator ruler.

- For tear volume measurement
- Phenol red thread tear test
- Results ready in 15 seconds

50 pairs per box, sterile

Dry Eye Accessories

PUNCTAL GAUGES FOR READY-SET PLUGS

Each instrument has one gauge size on one end, and a different gauge size on the opposite end.

- For proper plug sizing
- Stainless steel
- Includes autoclavable sterilizing case

Box of 1, non-sterile

REUSABLE DOUBLE DILATOR

- Stainless steel
- Box of 1, non-sterile
Lacrimal Duct Balloon Catheter

**OPHTACATH®**

**Fast and Efficient Procedure**

OphtaCath® achieves true dilation of the lacrimal duct and effectively treats the symptoms of epiphora.

- Eliminates placement of tubes
- Less invasive, reduced trauma

Visit FCI-Ophthalmics.com to watch the OphtaCath informational video.

**Balloon Catheter**

**OPHTACATH®**

- For nasolacrimal duct obstructions
- Fast effective procedure
- Eliminates placement of tubes
- Less invasive, reduced trauma
- Bilateral includes stopcock for simultaneous inflation

Box of 1, sterile

**Bicanalicular Intubation**

**NUNCHAKU®**

- A pushed self-retaining bicanalicular stent
- For canalicular pathologies
- For dacrystocystorhinostomy (DCR)
- For nasal lacrimal duct obstruction
- Stability through silicone tube design; no knot or suture needed

Box of 1, sterile

**SELF-RETAINING SET II (SRS II)**

Designed by P. Bigé, M.D.

- For horizontal lacrimal duct obstruction
- Punctal stenosis
- Silicone
- Set includes: stent and disposable dilator

1 set per box, sterile

**CRAWFORD**

- For congenital nasolacrimal duct obstruction and canalicular pathologies
- Stainless steel probe with nontraumatic, rounded olive tip

Box of 3, sterile

**BIKA®**

Designed by J.A. Bernard, M.D.

- For congenital nasolacrimal duct obstruction and canalicular pathologies
- Stainless steel probe with silicone tubing swaged into probe
- Nontraumatic rounded tip

Box of 3, sterile

**REQUIRES:**

- Disposable Sizer S1.1289u (see page 11)

Visit FCI-Ophthalmics.com to watch the OphtaCath informational video.
Bicanalicular Intubation (cont.)

INFANT BIKA®
Designed by J.A. Bernard, M.D.
- For infant canalicular stenosis/DCR
- Stainless steel probes entirely embedded in silicone tubing
- Appropriate for DCR because of its high flexibility
Box of 3, sterile

RITLENG®
Designed by P. Ritleng, M.D.
- For canalicular pathologies
- For nasal lacrimal duct obstruction
- Silicone, black PEEK (PolyEtherEtherKetone) thread-guide
- Silicone tubing (300 mm long, 0.64 mm diameter)
- Unique technique and design
Sterile
REQUIRES:
Ritleng Probe S1.1460 (see page 11)

See the surgical video and instructions at:
www.fci-ophthalmics.com/stents-tubes/rtitleng

GOLDBERG CERCLAGE
Designed by R.A. Goldberg, M.D.
- For reconstruction, trauma and chronic stenosis of the canalicular system
- Silicone, blue polypropylene suture
Box of 3, sterile
REQUIRES:
Pigtail Probe PT-1000 or PT-2000 (see page 11)

Monocanicular Intubation

MASTERKA®
Designed by B. Fayet, M.D.
A unique combination of a punctum plug with a preloaded lacrimal duct stent.
- For congenital lacrimal duct obstruction
- Anchored at the punctum by a plug
- No intranasal recovery
- Silicone stent pre-mounted on stainless steel introducer
Sizing is important for proper stent selection
Box of 3, sterile
REQUIRES:
Disposable Punctum Dilator and Plug Inserter S1.3090u (see page 11)
Disposable Sizer S1.1289u (see page 11)

MINI MONOKA®
Designed by B. Fayet, M.D. and J.A. Bernard, M.D.
- For canalicular lacrimal duct obstructions involving external 2/3 of one canalculus
- Stent is securely anchored at punctum by plug
- No knot or suture necessary
- Silicone
Box of 3, sterile
REQUIRES:
Disposable Punctum Dilator and Plug Inserter S1.3090u (see page 11)

WIDE/MEDIUM COLLARETTE MONOKA
Designed by B. Fayet, M.D. and J.A. Bernard, M.D.
- For congenital nasolacrimal duct obstruction and canalicular pathologies
- Silicone, stainless steel
- Nontraumatic rounded tip
- Silicone tubing swaged into malleable stainless steel probe
- Recommended: Disposable Punctum Dilator and Plug Inserter S1.3090u (see page 11)
Box of 3, sterile

FCI-Exclusive
Monocanalicul Intubation (cont.)

**SELF-THREADING MONOKA**

- Designed by B. Fayet, M.D., J.A. Bernard, M.D. and P. Ritleng, M.D.
- For congenital nasolacrimal duct obstruction and canalicual pathologies
- Silicone, black PEEK (PolyEtherEtherKetone) thread-guide
- Securely anchored at punctum by plug
- No knot or suture necessary
- Recommended: Disposable Punctum Dilator and Plug Inserter S1.3090u (see page 11)

Sterile

**REQUIRES:**
- Ritleng Probe S1.1460 (see page 11)
- Ritleng Hook S1.1480 (see page 11)

**MONO-CRAWFORD**

- For congenital lacrimal duct obstruction
- For canalicual pathologies
- Single plug anchors stent at punctum
- Recommended: Disposable Punctum Dilator and Plug Inserter S1.3090u (page 11)

Sterile

**REQUIRES:**
- Crawford Hook S1.1275 (see page 11)

**Jones Tubes**

**STOPLOSS™**

- Internal flexible silicone flange prevents tube extrusion
- Accurate tube sizing for each patient
- Simple-to-insert using dedicated disposable Introducer Set
- Large range of tube sizes
- Custom Removal Tool available

Sterile

**Lacrimal Stents & Tubes Accessories**

**RITLENG® PROBE**

Box of 1, stainless steel, non-sterile

**ENDONASAL FORCEPS**

Box of 1, stainless steel, non-sterile

**CRAWFORD HOOK**

Box of 1, stainless steel, non-sterile

**RITLENG® HOOK**

Box of 1, stainless steel, non-sterile

**DISPOSABLE SIZERS**

Box of 5, stainless steel PolyOxy-Methylene (POM), sterile

**DISPOSABLE PUNCTUM DILATOR & PLUG INserter**

Box of 3, sterile

**PIGTAIL PROBE**

Box of 1, stainless steel, non-sterile

**BOWMAN PROBE**

Box of 1, stainless steel, non-sterile

**REUSABLE DOUBLE DILATOR**

Box of 1, stainless steel, non-sterile

PTOSE-UP

Designed by J.M. Ruban, M.D.

Ptose-Up is a suspension set consisting of a strip of biomaterial made of expanded Poly Tetra Fluoro Ethylene (ePTFE) fitted with a needle at each extremity. It is used to join the upper eyelid to the frontalis muscle in ptosis surgery with frontalis suspension.

• Strips made of a biocompatible, porous, inert, biointegratable, non-toxic, ready to use, non-allergenic material

• 58 mm long needles with ultra sharp tips to facilitate strip insertion

• Convenient to place and adjust

• Excellent eyelid contour

• Reduces surgery time

• Inert material that can be removed easily

Box of 1, sterile

THINPROFILE™ EYELID WEIGHTS

• Implantable and external eyelid weights

• 40% thinner than Contour™ for more aesthetically pleasing treatment

• Provides a sleek, spherical curvature with tapered edges and rounded corners

• Channel-free 1.0 mm holes for added freedom in suturing position

• Gold or platinum implants offer excellent biocompatibility and functionality

• LL 4006-LL 4012 – 6.0 mm width

• LL 6006-LL 6012 – 6.6 mm width

Box of 1, sterile

REQUIRED:

Prior sizing. See Tantalum Eyelid Weight Sizing Sets TEW-7000 or TEW-7004 (see page 14)

EYELID REPAIR

Implants for Lagophthalmos

CONTOUR™ EYELID WEIGHTS

• Rapid recovery after operation and excellent tolerance

• Excellent functional and aesthetic results

• 1.0 mm thickness, 5.0 mm width

• Standard and special sizes

• Weight range from 0.6 grams to 2.8 grams

Box of 1, sterile

EYELID REPAIR

Ptosis Repair

PTOSE-UP

Designed by J.M. Ruban, M.D.

Ptose-Up is a suspension set consisting of a strip of biomaterial made of expanded Poly Tetra Fluoro Ethylene (ePTFE) fitted with a needle at each extremity. It is used to join the upper eyelid to the frontalis muscle in ptosis surgery with frontalis suspension.

• Strips made of a biocompatible, porous, inert, biointegratable, non-toxic, ready to use, non-allergenic material

• 58 mm long needles with ultra sharp tips to facilitate strip insertion

• Convenient to place and adjust

• Excellent eyelid contour

• Reduces surgery time

• Inert material that can be removed easily

Box of 1, sterile

PTOSIS SLING

Designed by J.L. Llouquet, M.D. and D. Guerin, M.D.

For Ptosis (with frontalis suspension)

• Ultra-sharp stainless steel needles

• Needles: 58 mm long

• Smooth connection between silicone tubing and needles

• Silicone sleeve: outside diameter 1.65mm, inside diameter 0.76mm, 10mm in length

Box of 3, silicone sleeve in each blister, sterile

PTOSIS SLING

Designed by J.L. Llouquet, M.D. and D. Guerin, M.D.

For Ptosis (with frontalis suspension)

• Ultra-sharp stainless steel needles

• Needles: 58 mm long

• Smooth connection between silicone tubing and needles

• Silicone sleeve: outside diameter 1.65mm, inside diameter 0.76mm, 10mm in length

Ptosis Sling Set
External Weights for Lagophthalmos

**BLINKEZE™ EYELID WEIGHTS**

- **Includes Treatment Kit**
  - An immediate and easy way to treat temporary facial paralysis or Bell’s palsy
  - Can be quickly attached to the upper eyelid with the included double-sided and hypoallergenic adhesive strips (EyeClose™ Adhesive Strips, LL 0505)
  - After placement, the levator muscle seems stronger
  - The proper weight allows to close the eyelid without difficulty and induces a slight ptosis (1.0 mm)
  - Standard width 5.0 mm

- **Box of 1, non-sterile**

**REQUIRED:**
Prior sizing and color selection. See Tantalum Eyelid Weight Sizing Sets and Skin Tone Selector (see below)

*When placing an order, specify the corresponding color that best matches your patients’ complexion (more information in FCI price list)*

OSMED self-inflating tissue expanders are made of a specially developed hydrogel that uses the osmotic principle to gain volume. These implants are indicated for the facilitation of normal growth of orbital tissues and bones to achieve proximate facial symmetry for the treatment of clinical anophthalmos, congenital microphthalmos, including post-enucleation socket syndrome.

After implantation, OSMED hydrogel implants start to absorb body fluid and grow consistently to a predefined form and volume. The increased volume of the implant – between 6 to 12 fold, depending on the product type – leads to an increase of soft tissue.

- High biocompatibility
- Similar hydrogel also used in soft contact lenses
- Low risk of infection
- Controlled hydrogel swelling
- Does not use valves
- Does not require inflation or deflation

HEMISPHERE - SOCKET EXPANDER

For the treatment of clinical anophthalmia, congenital microphthalmia, and postenucleation socket implantation to achieve proximate facial symmetry.

- Expansion of the conjunctival sac with clinical anophthalmia
- Enlargement of the surface of the mucous membrane
- Creation of a fold abutment/support for artificial eye prosthesis

Box of 1, sterile

SPHERE - ORBITA EXPANDER

For the treatment of clinical anophthalmia and to achieve proximate facial symmetry.

- Compensation of volume deficiency in the orbit
- Creation of an abutment/support for artificial eye prosthesis
- Enlargement of the palpebral fissure due to forward pressure from the artificial eye prosthesis

Box of 1, sterile
ORBITAL

Orbital Accessories

**DISPOSABLE SIZERS**
- For enucleation or evisceration
- To select accurate implant size
- PolyOxyMethylene (POM)
- Single use
Box of 4 in sizes 14, 16, 18 and 20 mm, sterile

**SPHERE INTRODUCTOR**
- For inserting orbital implant into socket
- Stainless steel
- Reusable
Box of 1, sterile

**SILICONE CONFORMER**
- To maintain the conjunctival cul-de-sacs after enucleation or evisceration without hindering lid closure
- Holes allow drainage of secretions and administration of drops
- Silicone
- Translucent
- One size, can be trimmed
- Single use
Box of 1, sterile

**ORBITAL Accessories (cont.)**

**PERFORATED CONFORMERS**
- To maintain the conjunctival cul-de-sacs after enucleation or evisceration without hindering lid closure
- Holes allow drainage of secretions and administration of drops
- Polyamide 12
- Translucent for visual control of the conjunctiva
- Single use
Box of 1, sterile

**SYMBLEPHARON RINGS**
- To prevent retraction of the conjunctival cul-de-sacs without touching the cornea
- Edges are highly polished and atraumatic
- Polymethylmethacrylate (PMMA)
- Translucent for visual control of the conjunctiva
- Single use
Box of 1, sterile

Pre-Loaded CTRs in Disposable Injectors

Visit FCI-Ophthalmics.com to watch the EyeJet informational video.

Choose between 2 insertion systems:
- Right (for clockwise insertion)
- Left (for counter clockwise insertion)

Available for the following CTR types:
- Morcher® 14, 14A, 14C
- Henderson CTR
- Malyugin/Cionni CTR

Capsular Tension Rings (CTR)

CTRs convert complex cataract cases from compromised zonular integrity into routine cases.

General Indications
- Missing or damaged zonules
- Lens subluxation
- Pseudoxeflaxation
- Myopia
- Zonulolysis
- Soft IOL
- Marfan’s Syndrome

General Advantages
- Circular expansion of capsular bag
- Stable conditions during surgery
- Improves IOL centration
- Reduced risk of capsular fibrosis
- Resists capsular shrinkage

MORCHER® CTR
- Designed to stabilize the capsular bag
- 3 different diameters to accommodate the variations in size of the capsule
- Unloaded, or pre-loaded on disposable injectors (EyeJets)
- Unloaded CTRs can be inserted manually or with the Geuder Injector G-32955 (see page 23)
- Opened and flexible filament of PMMA

Box of 1, sterile

HENDERSON CTR
- Designed by Bonnie Henderson, M.D.
- Indentations allow access to cortical material that might be trapped by standard CTR.
- Designed for easier cortical removal while maintaining the desired stretch around the capsule
- Unloaded or pre-loaded on disposable injectors (EyeJets)
- Unloaded CTRs can be inserted manually or with the Geuder Injector G-32955 (see page 23)
- Opened and flexible filament of PMMA

Box of 1, sterile

Visit FCI-Ophthalmics.com to watch the EyeJet informational video.
CATARACT

Capsular Tension Rings (CTR) (cont.)

CIONNI CTR
Designed by Robert J. Cionni, M.D.
- Modified version of Morcher® CTR: specifically designed for scleral fixation with suture (eyelets)
- Cionni CTR used to stabilize and recenter the capsular bag
- Recommended: 9-0 Polypropylene Suture Non-Absorbable
- Additional Advantages:
  - May be sutured to the sclera
  - Promotes circular expansion of the capsular bag

MALLYUGIN/CIONNI CTR
Eliminates the risk of perforating the bag. The curved end allows to slide the CTR along the equator of the capsular bag.
- Eyelet at the curved end is sutured to the sclera for secure fixation and offers an alternative to capsule supporting hooks
- The only Cionni CTR preloaded on an Eyjet and in a clockwise injection mode
- Preloaded, 11 mm
- Additional Indications:
  - More severe zonular weakness or missing zonules larger than 4 clock hours
  - Additional Advantages:
    - May be used intraoperatively (secured by iris retractor)
    - May be used as permanent support (sutured to the sclera)

AHMED SEGMENT
Designed by Dr. Ike Ahmed
- Available in two diameters and lengths
- Used to stabilize and recenter the capsular bag
- PMMA
- Additional Indications:
  - Significant zonular weakness
  - Additional Advantages:
    - May be used intraoperatively (secured by iris retractor)
    - May be used as permanent support (sutured to the sclera)

Cataract Accessories

GEUDER® CTR INJECTOR
- One-hand implantation by compressing the plunger
- Designed for clockwise insertion of Morcher® and Henderson CTRs
- Reusable
- Box of 1, non-sterile

GEUDER® PUPIL DILATOR INJECTOR
- Designed for clockwise one-hand implantation of the Morcher® Pupil Dilator (MR-5S)
- Reusable
- Box of 1, non-sterile

9-0 POLYPROPYLENE SUTURE NON-ABSORBABLE
- Stronger and particularly suitable for Cionni CTRs or for stabilizing an IOL
- Double-armed and packaged in box of 12
- Needles: straight or curved
- Suture: 5, 20 or 30 cm

MORCHER® PUPIL DILATOR
- Semi-circular elastic ring for expansion of the pupil during phacoemulsification
- Optimal temporary implant for contracted pupils or floppy iris syndrome
- May be inserted manually or with the Geuder® Injector (see above)
- Box of 1, sterile

Important Note: The pupil dilator should be implanted only with viscoelastic for protection of the corneal endothelium.

FCS-OPHTALMICS.COM
Cataract Accessories (cont.)

RING CALIPERS
- Temporary template to create a more precise anterior capsulorhexis
- Polyethylene terephthalate (PETM)
- Box of 1, sterile

APX 200 PUPIL EXPANDER
APX 200 is a pupil expander that provides surgeons with an effective pupil dilation, comfortable surgical performance and a high safety profile, in eyes with small pupils or floppy irises (IFIS).
- Fast, easy, and safe positioning and removal
- Efficient iris expansion – quadrangular or trapezoidal shape according to the physician’s preference and needs
- No intraocular manipulations required
- The physician does not operate over the device
- Does not interfere with surgical maneuvers
- Minimal learning curve
- One size, spring adjusts
- Nylon
- Each set includes 2 forceps and 2 pupil expanders

IRIS RETRACTORS
Stabilizes the iris during cataract and retina surgery.
- Flexible blue polypropylene
- Adjustable silicone ring
- Reusable or single use
- Sterile

MACKOOL CATARACT SUPPORT SYSTEM
Designed by Richard J. Mackool, M.D.
- Hooks provide capsular support during cataract surgery for patients with lax or absent zonules
- Comes with disposable stab knife
- Flexible and disposable
- Easy insertion and removal
- Box of 5, sterile

Kitaro Kits
KITARO DRY/WET LAB
- Created with the learning surgeon in mind
- Simulates the stages of cataract surgery using both a wet and dry lab environment
- Ability to practice techniques repeatedly
- Removes the complications of long preparation times and costly live tissue samples
- Sold ready-to-use, however, optional goods such as a speculum and soft nucleus are available individually
- Set includes a wide range of reusable and disposable goods such as the mask, forceps, anterior capsule film, and viscoelastic substance.
- Contact FCI Ophthalmics for the full list of these items.

KITARO COMPLEX LABS
Two kits for advanced surgeons.
Lab1
Phakic IOL insertion or complex cases such as small pupil management, weak or ruptured zonules, and intraocular lens transcleral fixation.
- Features and Benefits
  - Ability to practice techniques and procedures with realistic synthetic materials
  - Reusable and disposable goods are included in kits and sold individually as replacement parts only
  - Sold ready-to-use, however, optional goods such as a drain box are available individually
- Set includes a wide range of reusable and disposable goods such as the mask, forceps, corneas, and sclerocorneal sheets.
- Contact FCI Ophthalmics for the full list of these items.

Contact FCI Ophthalmics for the full list of these items.
Autostable Trocar Cannula System

- Unique Design for Optimum Stability in Complex Surgeries
  - Exclusive and patented design to ensure stability of the cannula, with special scleral ring feature
  - Ready-to-use for a one-step insertion
  - Ultra sharp knife for smooth and high precision incision
  - Cone-shaped cannula to make the insertion of instruments easier
  - 3 mm and 4 mm scleral marker
  - Supplied with a 23Ga and 25Ga infusion line compatible with BSS, gas and silicone oil

Trocar Cannula System RETILOCK®

Valved
- 3 Trocar cannulas mounted on ultra sharp knives
- 1 infusion line
- Transparent silicone valve and cone-shaped cannula for easy insertion of instruments

Non-Valved
- 3 Trocar cannulas mounted on ultra sharp knives
- 1 infusion line
- Cone-shaped cannula for easy insertion of instruments
- 3 plugs: compatible with standard forceps such as Paufique and Bonn forceps

Box of 5 kits, sterile, disposable

Probes

90° ADJUSTABLE LASER PROBES

- Exclusive design
- Angle of curvature: pressure-controlled (from 0° to 90°)
- Safe probe removal: goes back in straight position when releasing the handle
- Compatible with most laser machines
- 50% stiffer than competition
- Short stroke for optimal control
- Low pressure needed to actuate the handle
- Ultra precise concentric laser spot
- Available in 23Ga, 25Ga

Box of 10, sterile

LASER PROBES

- Ergonomic non-slip handpiece design
- Available in 23Ga, 25Ga, 27Ga
- Color coding for easy identification
- Ultra precise concentric laser spot

Box of 10, sterile

VALVED CANNULAS
S9.7000.23 23Ga
S9.7000.25 25Ga

NON-VALVED CANNULAS (Supplied with Plug)
S9.7000.23 23Ga
S9.7000.25 25Ga

It is recommended to gently insert the plug on the trocar.

Intravitreal Injection Device

INVITRIA® INTRAVITREAL INJECTION ASSISTANT
Eliminates Unnecessary Instruments
No speculum, caliper or pressure plate needed.
Assures Accuracy
Fixed guide ensures proper angle, depth and distance of injection every time.
Relaxes Patients
Invitria® immobilizes the eye and hides the needle resulting in less patient anxiety.
Prevents Leakage
Rotating the device pre- and post-injection displaces and replaces the conjunctiva over the injection hole.
Compatible with:
- BD 30G 13 mm cannula
- B.Braun Sterican® 30G cannula

Vitreoretinal Accessories (cont.)

FCI 3-MIRROR LENS
Exceptional visualization every time
- Material: PMMA
- Angulation of 59°, 67°, 75°
- Central view 30°
- Image magnification 0.93x
Box of 5, sterile

IRIS RETRACTORS
Stabilizes the iris during cataract and retina surgery.
- Flexible blue polypropylene
- Adjustable silicone ring
- Reusable or single use
